AIRPORT MALARIA

The disease Malaria (1.transmit) by mosquitoes. It (2.be) a very old disease. It (3.believe) that prehistoric man (4.suffer) from malaria. It probably (5.originate) in Africa and (6.accompany) human migration to the Mediterranean shores, India and South East Asia. In the past, it used to be common in the marshy areas around Rome, and the disease (7.name) 'mal-aria', meaning 'bad air' in Italian; it (8.also, know) as Roman fever. Today some 500 million people in Africa, India, South East Asia and South America (9.expose) to malaria and it (10.estimate) to cause two and a half million deaths annually, one million of which are children. In recent years, the so called "airport malaria" (11.become) a big problem in Europe as well. A bartender who (12.work) in an establishment close to 23 London's Heathrow Airport (13.become) acutely ill and (14.diagnose) with malaria, although he (15.never, be) out of the country. A lady who (16.drive) her car past the same airport (17.become) ill with malaria although she, too, (18.never, be) out of the country. Four workers who (19.unload) a cargo plane at Amsterdam Airport (20.become) infected with malaria. It (21.assume) that, in all these cases, infected mosquitoes (22.carry) on planes from Africa and (23.release) at the destination airport.
